

Sunday Matters Survey Response update:

Thank you to the 161 people who responded to the survey and the 70 people who made comments (8 pages!).

The most positive response went to the lectors proclaiming the scriptures well. Msgr. got high praise on connecting the homily to liturgy and scripture. But he is always looking for ways to be more effective.

The greatest change people wanted was a new audio system. We heard you! The Parish is planning to install a new audio system soon and a new heating/air conditioning system was already being planned at the time of the survey.

The music ministers, recognizing themselves as leaders of worship, are examining ways to foster greater participation by the congregation in the singing.

The team is working on creating a plan for change that will take time and work ex: ongoing formation for all ministers, development of the hospitality ministry with the emphasis on “intentionality.”

We are very grateful for your feedback. What you say matters! But please be patient!

And of course, we are in this together! Nothing can be done without you!
